Collated by Craig Box 25 September

Section 1: Membership

- Are you a paid member of the Waikato Linux Users Group?
 - -50% yes
- If not, why not?

1. Are you a paid member of the Waikato Linux Users Group?

| Answer | Count | Percentage |
|-----------|-------|------------|
| No answer | 1 | 1.75% |
| Yes (Y) | 29 | 50.88% |
| No (N) | 27 | 47.37% |

Why not a member?

At this current stage I don't think I have A) anything to offer the LUG B) see no compelling $\ \ \, \text{need to join.} \ \, | \, \, \text{Basic Lazyness, Will rectify shortly} \, | \, \, \text{benefits are not attactive.} \, | \, \, \text{Did not} \, \,$ want to join at (near) the end of the membership year. | didn't get around to it, also since I live about 1 hour's drive away (but still in the waikato) from Hamilton I don't attend meetings and can't participate except through the mailing list | Don't actually use linux due to satisfaction with XP and lack of time to learn linux to the same level as windows. | Err. I'm not in the Waikato. I don't come to meetings, etc. | Haven't seen a benefit in it yet. At times rather university centric | Havn't gotten around to paying! | I didnt know there was a membership fee | I don't like the fact that wlug only allow subscriptions for a full year and that they don't start from the date you pay. \mid I don't use Linux enough to justify it \mid I have been unable to attend the WLUG meetings due to my living location and lack of transport. | I live in Meremere, and I can only attend meeting irregularly | I live outside your area. | I never got round to being a paid member... | I never signed up because I've moved countries. | In all honesty, pure laziness | Live out of town | Live outside the Waikato | never got round to it | No benefit for me. I'm still not actually using Linux at home but want to be ready when i bite the bullet. | Since I cannot attend meetings its not a focus on a daily basis and I dont think of it \mid Started a new business, money is pretty limited for the moment. Once things are better, I'll definitely be renewing my membership. | Student - No money! | was once, but it ran out | While I'm interested in Linux, I don't have the time to be more than a lurker on the mailing list.

2. Why not?

- Out of town
- Lazy
- No benefit/Not experienced enough with Linux
- I don't like the fact that wlug only allow subscriptions for a full year and that they don't start from the date you pay.

Section 1: Membership

- Do you feel you have received value for money from your membership fee?
 - 100% yes!
- I feel the cost of WLUG membership, \$20/year, is:
 - 89% just right, 7% too low, 4% too high
- Do you feel we clearly communicate the benefits of membership, and how to sign up?
 - 62% yes
- 2. Do you feel you have received value for money from your membership fee?

100% yes.

3. I feel the cost of WLUG membership, \$20/year, is:

| Answer | Count | Percentage | |
|-----------------|-------|------------|--------|
| No answer | 0 | 0.00% | |
| Too low (low) | | 4 | 7.02% |
| Just right (ok) | | 51 | 89.47% |
| Too high (high) | | 2 | 3.51% |

4. Do you feel we clearly communicate the benefits of membership, and how to sign up?

| Answer | Count | Percentage |
|-----------|-------|------------|
| No answer | 1 | 1.75% |
| Yes (Y) | 35 | 61.40% |
| No (N) | 21 | 36.84% |

How could we make this better?

• Advertising (at installfests etc) - "Why should I become a member of WLUG". Also, should be able to explain it in a few sentences to anyone who asks. | Benefits ??? what are they where are they ?? A wiki is fine but you need a website too se we can find stuff. | Communicate them? I'm a frequent visitor to www.wlug.org.nz and a member of the mailing list - but apart from the fact that the WLUG has a Library, I'm not aware of any other benefits of being a WLUG member. | distribute pamphlets/information more widely. have information days with the public and exchange talks with other user groups. | Give me an incentive to read it ... | how to sign up yes the benefits of membership for someone who isn't close to Hamilton are not clear | I don't really know what I get for signing up - I know I get a shell account, but I don't really need one, and I know I get access to a library I would never use. Don't have a clue how to signup | I have not check recently (noticed some changes to the site) but benefits should be listed on the membership page clearly. Also, there is no "join wlug" on the front page, forcing a potential member to look around the site. | I'm kind of like the fact you don't | Just make it more obvious... Tough question really. I've found the page, but you need to go through a couple pages to find them. | Listing of benefits on the membership form. Viral marketing with people saying how cool it is to be a member of WLUG and use their services. | maybe by making it more known. also is it mandatory? or can people just come and be a part of this group regardless? | more info about getting shell/email accounts | more info on and off line | No idea. But I don't know what the benefits are so I guess they haven't been clearly communicated to me. :) | not sure | Promote it | some users may not know about email and shell accounts

5. How could we make this better?

Most people who answered are not aware of what they were going to get when they signed up. Some didn't even know if it was mandatory or not. You will have noticed this has changed on the new membership form.

- "No idea. But I don't know what the benefits are so I guess they havn't been clearly communicated to me. :)"
- "I kind of like the fact you don't"
- "Also, should be able to explain it in a few sentances to anyone who asks."

| Monthly (month) | 36 | 63.16% |
| Bi-monthly (bimon) | 1 | 1.75% |
| Other (-oth-) | 2 | 3.51% |

Please comment on the balance of meetings

- More fixit meetings
- Less fixit meetings
- Would like to see monthly meetings, and in-between workshops.

- 7. Please comment on the balance of meetings (internal speakers vs. external speakers vs. bring a box etc)
- More fixit meetings
- Less fixit meetings
- Would like to see monthly meetings, and in-between workshops.

Is there anyone you would like to see present a meeting, or any topics you would like covered?

- Linus Torvalds
- Steve Jobs
- RMS
- Bill Gates

8. Is there anyone you would like to see present a meeting, or any topics you would like covered?

- Steve Jobs, Linus Torvalds, RMS, Bill Gates (no Eric Raymond I see)
- More tutorials on advanced topics/howtos
- A session where several members give "My favourite techniques/strategies/tips for useful, trouble-free computing" how to get the best out of Linux "what I find most useful" etc.

• No one picked ESR!

I've been to a BBQ

- seems quite "clique-y" all the uni and ex-uni people hang around together
- Very blokey. I left before the meat was cooked
- Low participation
- end of year bbq's are wicked.. they rule.
- Backyard cricket was great. I like the fact it's just the group of the people, and not another sit around and nerd (verb) event. I wouldn't go if it was.

| No answer | 0 | 0.00% |
| Yes (Y) | 53 | 92.98% |
| No (N) | 4 | 7.02% |

On the mailing list

- Yes: Please give your comments on the mailing list: Do you think it is a useful tool? Have you had a problem solved? Are you comfortable with asking for help on the list? Do you think the geographical density is suitable?
 - Overwhelming 'yes to all'
 - "90% is a waste of time, and I probably dont do much to help with that."
 - "No mailing lists are overrated. It's 2005 lets get something a little less 1980's"
 - "The signal-to-noise ratio seems to be getting lower... I hardly read it these days for that reason."

Not on the mailing list

• I am about to sign up for it. If you havent already it would be good to see some real basic info, like primary school level stuff re: how linux exists on your pc, its build concept etc. from my surfing on the net for this info it seems to be over looked or only partially covered. We need to reeducate people on a fundamental level so we can get more adopters of this technology. Quote "most end users have the technical aptitude of a banana" and yes 80% of pc users are like this

No: Could we make it more relevant for you?
